

Universal Energy Clearing

Quantum Activated Codes (QAC)

Agriculture

These QAC's are specifically designed for all agriculture, from small farms, garden up to large scale farms.

Each input is activated and enhanced with a variety of different vibrations, frequencies, octaves, and fractals to achieve a higher resonance and success. Not just designed to work to correct any imbalances immediately but also contribute to the overall phase of the growing cycle.

Can be used in radionics instruments for a direct broadcast, with BD Field Broadcasters and on the Quantum Broadcast. Can be easily imprinted into water, fertilizer and feed and then apply via crop fertigation, in animal feed or foliar mister. Use with Broadcaster either to put at the base of the broadcaster, add into bottom or top well, to enhance the activity for a certain time for a specific issue or reason.

All QAC's are designed for use with all radionics instruments and Quantum Broadcasters (direct broadcast). All QAC's can also be copied into a liquid homeopathic substance and applied directly to the animals or added into the water system or into the feed.

Individual Quantum Activation Codes & Sets

Single QACs

Apply using any radionics instrument, Universal Energy Transmitter, potentize and apply through irrigation, foliar or use with animals.

If Magnesium is too high, transmute to Calcium - \$60

If Sodium is too high, transmute to Magnesium - \$60

If Sodium is too high, transmute to Potassium - \$60

Biodynamic Soil Activator - \$60

A reagent that includes all the BD preps and is attuned to the new earth energies. It is not just the earth's energies that are changing the environment around us – our personal energy and the

energy of the people on the land are in a constant shift as well. This reagent covers not just the traditional BD preps, but also a wide variety of different frequencies and octaves.

Hail Be Gone - \$60

Used in conjunction with broadcasters and radionics instruments to shift the pattern of hail, so it does not affect the intent area.

Soil Balance - \$60

Balancing, fertility release and increase, energy boost and biological enhancer. To boost/reduce and balance the lime and atmospheric realms. Increasing and maintaining the life force from the soil up for healthy, pest/disease-free crops and livestock.

Frost Protection - \$60

Used in broadcasters and radionics instruments. It will increase the plant's defense mechanism to withstand frost.

Attract Rain - \$60

Setting up the environment to attract rain. Forcefully and continuously break any cords that draw unhealthy amounts of life force to the environment. Farm, plants, and animals have the right amount of water. Organizing patterns for rain to move in and release. Balancing all attracter energy fields to communicate in the same frequency to bring rain consciously to the farm.

Ticks - \$120 for a set of 2 | \$300 for all sets (6 QACS)

These QACs are designed for Australian ticks and are used for broadcasting radionically and on the Quantum Broadcaster to land and/or animal. Can be potentized and added to water, food and fertilizers application at the same time. QACs for tropical brown dog tick, paralysis tick and cattle tick. Each contains 2 QACs.

Weed and pest control Complete custom peppering - \$250 | 4 + Peppers - \$200 per pepper

Weeds and pest ca be a nuisance on the farm and can reduce yield and profits. We offer a variety of different techniques and approaches to reduce the impact of these issues. Using a biodynamic method of peppering animals or weeds will give us the base potency to start a with customized program.

Applications is then tailored to suit customer. Application via any radionics instruments, Universal Energy Transmitter, Quantum Broadcaster potentized through irrigation, foliar or animals and other methods.

QAC Sets

A Complete Set Consists of 25 Individual and Activated QACS (25 QACS) - \$975:

Ammonia, Boron, Calcium, Carbon, Chlorophyll, Cobalt, Copper, Hydrogen, Iodine, Iron, Magnesium, Manganese, Molybdenum, Nitrate, Oxygen, Phosphate, Potassium, Selenium, Salt, Silica (2 vials), Sulphur, Zinc, Acidity, Alkalinity.

Biodynamic Preparations Set (19 QACs) - \$ 700:

A complete and full set of all the biodynamic preparations. Each prep is enhanced and activated with a variety of harmonics and octaves to capture the deeper essence and bring forth an immediate desired outcome.

Can be used in radionics instruments for a direct broadcast, on the Universal Energy Transmitter, imprint into water, fertilizer and feed and then apply via crop fertigation, in animal feed or foliar mister. Use with Broadcaster either to put at the base of the broadcaster, add into bottom or top well, to enhance the activity for a certain time for a specific issue or reason.

Set includes: BD 500, BD 501, BD 502, BD 503, BD 504, BD 505, BD 506, BD 507, 508, BD Enhanced Soil Activator, 3 Kings (Frankincense, Gold, and Myrrh), Winter Horn Clay, Summer Horn Clay, Cow Pad Pit, Spring to Spring Horn Clay, Fall to Fall Horn Clay, Oesophageal Clay, Soil Balance, BD Soil Activator

From Planting To Harvest Set (4 Activated QACs) - \$240:

Ag 1 – Start Of Season/Planting

Used at planting for root growth, root development and quick germination. In horticulture, before bud break. Developed so plants will have a strong start for the new growing season.

Ag 2 – After Germination to Mid-season

After germination and bud break. Stimulates vegetative growth and a strong structural system. Fluid flow and plant growth.

Ag 3 – After Mid-season Towards End Of Season

Enhances photosynthesis, and increases fruit, seeds, and crop yields. Reduces stress on plants. Strong structural integrity to support crop yield. Increase crop size.

AG 4 – Towards End Of Season

Towards the end of the season for fruit, seed and root size, plant support and strength. Apply using any radionics instrument, Universal Energy Transmitter, potentize and apply through irrigation, foliar or animal.

Agricultural Combined Set (All 4 Agricultural Sets – 51 QACs) - \$1600:

Includes the following sets: Activated Individual Fertiliser Set (25), BD Preparations Set (19), from Planting To Harvest Set (4) Mag transmute to Cal, Sodium transmute to Mag, Sodium transmute to Potassium (3).
